

Water based anti-spatter for welding 5L (W504)

This product is in the 5 liters format, and it's perfect for professional uses and for domestic uses. It's ideal for different types of welding, it prevents seizures, corrosions and oxidations.

WATER BASED ANTI-SPATTER FOR WELDING – Synthetic film-forming polymer-based product emulsifying in water; its specific properties prevent the welding drops from seizing onto any support. Moreover it prevents the chemicals from forming oxides and corrosions. It can be used in case of autogenous, electric and inert-gas weldings. This higher- performance product is free from silicone substances, solvents or any other noxious substances for human health. A little quantity gives the expected result.

Technical specifications:

Barcode	EAN: 8034108890494
Quantity	5 L
Confection	1 Pz.
Aspect	Plastic tank
Colour	Transparent
Odour	odorless
Relative density	At 20°C 1,10 ÷ 1,14 g/ml
Flash point	Not flammable
PH	7 (50 g/l, 23°C)
Flash point pure base	>100°C.
Ignition temperature	>200 °C(liquid base)
Cinematic viscosity	55-65 mm ² /s (20°C)(liquid base)
solubility	Hydrosoluble

HOW TO USE: Shake well before use. Attention the product is pure then has to be diluted with water. Suggested dilution 20% W504 product, 80% water. Given the variety of operations which may be performed in the field of welding, the dosage and optimal dilution should be determined "on the field." Product for use in the welding robot or with an air gun, on the surface to be treated, taking care to give the jet maximum atomization possible.

MODALITY OF STORAGE

Before using: stock the product in a dry location and don't stock it with a temperature under 5°C degrees and over 45°C, after the use, keep containers closed. In the original package, the product can be conserved for 24 months.

After the first usage: conserve in a fresh and dry location, away from hot spring. Keep out of reach of children.
